Keywords----Social responsibility research

I. INTRODUCTION

THE world community today are facing problems due to lack of balanced development as a result of its development, but only by a context surrounding that are ignored. The importance as well as economic growth, but alone.

So strong is the economic factors driving the development of another side. But the reality was reflected in the opposite way. The world is currently facing crisis in social ethics, including environmental crisis. These changes affect the economy and well-being of the population in all regions. The country is now experiencing that the Thai citizens in the nation is not yet a global recall, not obey the duties of a good citizen. In this situation, Thai people need to create harmony. Have patience and suggested that would be beneficial to the country. Social responsibility of the Thai people, Thai people are collaborating. Contribute to solving the problem. Thai people should come together to create harmony in the nation.

Corporate social responsibility is one of the important concepts that should be used to develop people, better quality. Social responsibility this would happen. Want to get to know and to learn from experience and practice seriously. Therefore, to instill the concept of social responsibility is an important foundation of society and the country. To cultivate social responsibility to the youth of the nation. Development of social responsibility, the institute should continue to promote the development of students' responsibilities. Students have learned from actual practice in educational institutions, family and the community. School must supply the media environment around teaching and support activities contributing to strengthen the livelihood. Activities that are contributing to the development of corporate social responsibility can be done in several ways, such as providing training, knowledge and use of fictional roles. Counseling, group activities and scenarios used in connection.

Due to the importance of corporate social responsibility. So researchers are interested in doing research synthesis regarding corporate social responsibility. To find out the conclusion that knowledge from the research. Can apply knowledge to beneficial knowledge research on corporate social responsibility.

II. OBJECTIVES

To study the research related to social responsibility. In educational institutions, both at the basic education level and at the level of higher education. In the opinion of the research and the research methods.

III. THE SCOPE OF RESEARCH

1. As research tracing can be completely original.
2. The research could trace information as well as research thesis. And research articles related to social responsibility in educational institutions, both the level of basic education, and higher education level studies. Since the year 1993 until 2013 compression. IV. ACTION STEP OF SYNTHESIS RESEARCH

This research synthesis is a description. A summary of study on strategic issues regarding content. By way of commentary and analysis of content to perform the following actions:

1. Surveys gather research synthesis with an education from our research database ThaiLIS- Thai Library Integrate System Of the Office of the higher education Committee.
2. Define the issues and show how the subject matter of the research.
3. Read and understand abstracts in research reports that are synthetic.
4. To specify the classification and identification of research As a step in improving data from the research. As a quantitative data. Which must be considered in the nature of research and research methods. Which will cover the study variables.
5. Analysis of characteristics of research Classification and synthesis by enumeration analysis and study on the variable content.
6. Synthesis of results and written reports.

V. THE POPULATION IN THIS RESEARCH

Research and graduate thesis related to social responsibility. In educational institutions, both the level of basic education, and higher education level studies. Since the year 1993 until 2013 compression. The number of 14 books. By tracing from our database ThaiLIS- (Thai Library Integrate System) Of the Office of the higher education Committee.

VI. TOOLS FOR RESEARCH

The research report field notes which have a 3 part.

1. on the basis of research.
2. How to conduct research. And
3. The research results.

VII. ANALYSIS OF THE DATA

1. Using descriptive statistics and content analysis.
2. Presentation of information in a table format and lectures include.

VIII. THE RESEARCH RESULTS

The population was found to be used in most of the research is on the secondary school level 50.0 percent and secondary education levels is 35.71 percent.

The research plan that is used mainly as an experiment. 57.14 percent

The purpose of the research, corporate social responsibility mainly is to compare the social responsibility with the other study variables 56.0 percent.

Tools used in all research queries 100 percent.

Statistics that are used in research, corporate social responsibility. The analysis found that the average value and

standard deviation. There is at most a secondary 40.62 percent down is one way ANOVA variance 21.87.

IX. SUMMARY OF THE RESEARCH RESULTS

The research analyzed 14 issues research, corporate social responsibility, most of the students in secondary-level populations, higher education levels also have very little. Most of the research will be a trial. Contains interpolation to manage teaching and learning activities, and that is what makes it interesting and widespread here.

In order to encourage a focus on corporate social responsibility seriously in Thai studies. In fact, in the present. There may be a faculty researchers work on Student Affairs in higher education institutions that work in progress or research activities including interpolation social responsibility in teaching management but not as universally or during trial operation. It suggested in its information work as research that gives a clear step by step process. It will have new knowledge about corporate social responsibility add even more.

This research aims to professors and researchers that work in Student Affairs, and those involved in education management in higher education institutions has brought the activity to make a presentation in a format more research will be spread about corporate social responsibility, widespread social call.

X. THE RESEARCH SYNTHESIS

1. Attawat Niyomtoa. A comparison of the achievement of self responsibility and social responsibility of students, grade 7 social studies classes by using the taught, integrated with instruction by a teacher's Guide.1993. Srinakharinwirot University.

2. Pawwanar Teankaw. A comparison of student achievement, ability to think of problem-solving and social responsibility of students, grade 7 social studies classes with tutorials to teach problem solving based on the teacher's Guide. 1997. Srinakharinwirot University.
